*There is about a 2-4 week delay in the data for a jurisdiction to confirm a case of SARS-CoV-2 in a pregnant woman and report it to CDC.

**Date of diagnosis is derived from the earliest date of either 1) when the case report was received by CDC from a jurisdictional health department or 2) the earliest available date related to the illness or specimen collection.

Pregnant women with COVID-19 by age, United States, January 22, 2020 - May 24, 2021

Data were collected from 92,763 women, and age was available for 92,763 (100%) women.

[Download Chart](#)

Pregnant women with COVID-19 by race/ethnicity, United States, January 22, 2020 - May 24, 2021

Data were collected from 92,763 women, but race/ethnicity was only available for 80,126 (86.4%) women.

[Download Chart](#)

Pregnant Women with COVID-19 who were hospitalized, United States, January 22, 2020 - May 24, 2021

Data were collected from 92,763 women, but hospitalization data were only available for 74,276 (80.1%).

HOSPITALIZED CASES³

15,867

Pregnant women with COVID-19 admitted to the ICU, who required invasive ventilation, or who required ECMO, United States, January 22, 2020 - May 24, 2021

Data were collected from 92,763 women, but ICU admission data were only available for 12,747 (13.7%) women, invasive ventilation data were only available for 8,806 (9.5%) women, and ECMO data were only available for 9,415 (10.1%).

¹Cases with age <9 years and >54 years are excluded. Cases with unknown age are included.

²Other race includes non-Hispanic American Indian or Alaska Native or non-Hispanic Native Hawaiian or Other Pacific Islander

³ Data were not available to distinguish hospitalization for COVID-19-related indications, such as worsening respiratory status, from hospital admission for pregnancy-related indications, such as delivery.

⁴Abbreviation: ICU, intensive care unit; ECMO, extracorporeal membrane oxygenation, an advanced life support technique used for patients with life-threatening heart and/or lung problems.

evidence of SARS-CoV-2 infection.

There are currently 56 U.S.-affiliated jurisdictions reporting cases of COVID-19 to CDC. This includes 50 states, District of Columbia, Guam, New York City, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands. Only about a third of case report forms include information on pregnancy status. Therefore, these numbers likely do not include all pregnant women with COVID-19 in the U.S. and must be interpreted with caution. The completeness of the pregnancy variable continues to improve each week. Increases in the total number of cases of COVID-19 among pregnant women are largely due to the updating of pregnancy status among already reported cases. Case numbers reported on other websites may differ from what is posted on CDC's website because CDC's overall case numbers are validated through a confirmation process with each jurisdiction. Differences between reporting jurisdictions and CDC's website may occur due to the timing of reporting and website updates. The process used for finding and confirming cases reported by other sites may differ. Case counts may fluctuate from week to week due to data quality and cleaning processes.

Since October 2020, CDC has excluded reports of cases of COVID-19 among pregnant women who are younger than age 9 and older than age 54 in the weekly reporting. Based on review of data quality, cases reported as pregnant with ages younger than 9 or older than 54 are less likely to be true pregnancies, and more likely to be data errors. Cases with unknown age are still included.
